CementoCare®

PUTTY BOOST®

Dosage

Recommended Dosage For Medium Workability: 1.2% By Weight Of Putty For Outstanding Results & High Workability, Very Low Water/Putty Ratio And For Self Compacting Mixture : 2.0 - 2.5% By Weight of putty.

It is advisable to carry out trial mixes to establish the correct dosage.

USES

4K PUTTY BOOST® PK is used as bonding agent and sitemix mortar admixture for the following applications:

- White Cement Based Putty
- Grouts and screeds
- Patch repair mortars
- Mansonry mortars
- Renders
- Tile adhesives

Characteristics &Advantages

The main advantages of 4K PUTTY BOOST® PK are:

- Increased adhesion
- Reduced shrinkage and cracking
- Increased abrasion resistance
- Reduced permeability
- Improved workability
- User friendly
- Increases Pot Life
- Makes Application Easier
- Increases Strength

Suitable on most common construction substrates
